Addressable Messaging System

TFT EAS911

Encoder/Decoder includes separate AM/FM/NOAA Receiver

OR

MIP 921

SAM encoder/decoder, internal AM/FM receiver.

- ◇ Same cost as many IF systems with more flexibility to grow.
- ◇ Can be easily expanded, start with one channel, add others later.
- ◇ Text crawls over normal video or full page text displays.
- ◇ Send alert message while keeping channels up.
- ◇ Professional quality genlock Character Generator for each channel.
- ◇ System can be used for promotional and community information.
- ◇ Program and store messages.
- ◇ Local alert and details channel capability.

Complete 50 channel system from 9,700.00.
Add text crawl to each channel for as little at \$325.00 per channel.
